Ministry of Higher Education and Scientific Research Scientific Supervision and Scientific Evaluation Apparatus Directorate of Quality Assurance and Academic Accreditation Accreditation Department

# Academic Program and Course Description Guide for the Chemistry Department

2024-2025

### **Introduction:**

The educational program is a well—planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staP together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quaJerly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

### **Concepts and terminology:**

<u>Academic Program Description:</u> The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

<u>Course Description:</u> Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

<u>Program Vision:</u> An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

<u>Program Mission:</u> Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

<u>Program Objectives:</u> They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

<u>Curriculum Structure:</u> All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

**Learning Outcomes:** A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

<u>Teaching and learning strategies:</u> They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra—curricular activities to achieve the learning outcomes of the program.

### 1. Program Vision

The Department of Chemistry seeks to achieve excellence and leadership in pure and applied chemistry through a comprehensive academic program that encompasses organic, inorganic, physical, analytical, and biochemistry. The program aims to keep pace with scientific and educational developments at both the local and global levels by enhancing the quality of academic and research performance.

The vision emphasizes preparing graduates with a solid foundation in chemistry, along with pedagogical and research skills that enable them to excel in teaching and work effectively in educational institutions. The Department also strives to foster innovation, research, and entrepreneurship among students, encouraging them to develop their own projects that expand career opportunities beyond traditional employment.

Furthermore, the vision of the Department is to provide a stimulating academic environment that supports continuous training and development for faculty and staff, while engaging students in scientific, laboratory, and extracurricular activities that enhance critical and creative thinking as well as communication and presentation skills. Through investment in research and innovation, the Department seeks to transform knowledge into added value that benefits society and consolidates its position as a leading academic institution.

### 2. Program Mission

The Department of Chemistry aims to prepare graduates with scientific thinking skills, analytical abilities, and the capacity to address and solve chemical problems using innovative approaches. It also ensures that students acquire a solid foundation across the theoretical and applied branches of chemistry, supported by modern teaching methods and advanced educational technologies at both undergraduate and graduate levels.

The mission emphasizes developing academic and practical skills that enable graduates to integrate effectively into the labor market and contribute to educational, industrial, health, and service sectors. The Department also promotes scientific research by encouraging graduate studies and building local and international partnerships with universities, research centers, and industry.

The program seeks to prepare future leaders capable of assuming responsibilities in education and research, contributing to the training of new

generations of distinguished teachers and researchers. The mission is realized through a supportive academic environment that fosters active learning, critical thinking, and applied scientific research, alongside high-quality programs aligned with international accreditation standards.

### 3. Program Objectives

- 1. Education and Teaching: Prepare graduates with creative and effective teaching skills, capable of contributing to the development of education at different levels.
- 2. Knowledge and Application: Enable students to apply chemical knowledge in analyzing real-world problems and providing innovative solutions.
- 3. Scientific Research: Strengthen students' abilities in research and development, and qualify them to pursue graduate studies in chemistry and related sciences.
- 4. Community Service: Provide the educational, industrial, and health sectors with qualified professionals who contribute to development and community service.
- 5. Professional Development: Enhance graduates' academic and practical skills to ensure their competitiveness and successful integration into the local and regional labor market.

Does the program have program accreditation? And from which agency?

5. Other external influences

Is there a sponsor for the program?

### 8. Expected learning outcomes of the program

### Knowledge

### Learning Outcomes 1

The student is able to understand the various branches of chemistry. The program prepares chemistry teachers at levels that keep up with the ongoing developments.

### Learning Outcomes Statement 1

- 1. Enabling the student to acquire theoretical knowledge in the field of chemistry.
- 2. Enabling the student to understand teaching methods and how to effectively convey scientific information to students.
- 3. Ensuring the student is familiar with measurement and evaluation techniques, as well as modern teaching methods in chemistry.
- 4. Allowing the student to access educational material electronically through virtual classrooms, in addition to providing them with knowledge of learning theories related to the age group of high school students.

### Skills

Learning Outcomes 2

The student should acquire discussion skills and be able to reach conclusions.

### **Learning Outcomes Statement 2**

- Equip and enrich the student with laboratory work techniques.
- Guide the student toward a scientific approach in solving all scientific problems.
- Familiarize the student with the objectives and principles of the art of teaching chemistry.
- 4. Enable students to acquire the skills needed to use virtual classrooms effectively.

### Values

Exams, daily assignments, discussions, laboratory reports, graduation projects.

- Adopting a dialogue-based approach between the student and the professor.
- Focusing on research projects and preparing well-organized reports.
- Adopting a discussion-based approach (performance experiments and seminars).
- Implementing e-learning to provide an engaging and flexible educational environment.

### 9. Teaching and Learning Strategies

1- The application method in research laboratories. 2- Adoption of purposeful and constructive dialogue and discussion. 3- Adoption of the trial and error method. 4- Adoption of multiple media in virtual

classrooms (image, text, sound, video).
10. Evaluation methods
1- Seminar research preparation (graduation project). 2- Adoption of a grading system as a basis for the evaluation process. 3- Adoption of testing methods. 4- Adoption of discussions and dialogues between students and professors. 5- Creation of an assessment task in virtual classrooms.

### **Professional Development**

Orientation for New Faculty Members

College Councils, Department Councils, Temporary and Permanent Committees, Training Courses

Professional Development for Faculty Members

- 1. Using up-to-date scientific sources.
- 2. Using fast communication networks to transfer information, such as the internet.
- 3. Visits and practical experiences in service laboratories.
- 4. Gaining scientific and modern skills in the field of modern technical communication.
- 5. Training courses, seminars, and specialized scientific workshops.

### **Admission Criteria**

- 1. Admission based on the general and central average system.
- 2. Admission to departments based on the student's preference and GPA.
- 3. The requirement is for high school graduates, specifically from the scientific track.
- 4. The accepted student must be physically and mentally healthy, free from physical disabilities.

### **Key Sources of Information about the Program**

- 1. Textbooks approved by the sectoral committee for colleges of education for pure sciences.
- 2. Supplementary books.
- 3. Historical books and resources / Sources in English.
- 4. Additional sources from the internet.
- 5. Training courses organized by the university on e-learning platforms.

### **Program Development Plan**

- 1. Curriculum development.
- 2. Expanding the admission plan.
- 3. Using modern teaching methods.
- 4. Using modern educational tools.
- 5. Developing laboratories.

4. Date this description was prepared					
20-1-2025					
5. Available forms of attendance					
My presence					
6. Number of study hours (total) / Number of units (total)					
2 hours and 2 units					
7. Name of the course supervisor (if more than one name is mentioned)					
Name: Baidaa Mohie Rman Email:					
8. Course objectives					

- Helping students to read and write correctly and obtaining student outcomes targeted learning
- Recognizing the importance of the Arabic language and its relationship to guidance, diagnosis, classification and research Scientific
- Learn about scientific foundations and scientific specifications and how to apply them to scientific materials. For study

Subject objectives

### 9. Teaching and learning strategies

- 1. Activating the learner's role in educational situations
- 2. Encouraging learners to generate creative ideas about a specific topic, by searching for correct answers, or possible solutions to the issues presented. On them

Strategy

### 10. Course Structure

Evaluation	Learning	Name of the unit	Required	Watches	The week	
method	method	or topic	learning			
			outcomes			
Written and oral tests	The casting	Surah Al-Fatihah			the first	
		Surah Al-Fajr			the second	
		Hamza (connected, disconnected, medial and extended)			the third	
		punctuation marks			Fourth	
		Monthly exam			Fifth

### **Course Description Form**

Instructor Name: Asst. Prof. Dr. Shaymaa Naji Dahham

**Course Description: Contemporary Theoretical Biology** 

The course description was prepared according to the terms approved by the sectoral body of the colleges of education in all universities of the country within the topics of the first stage of the life sciences departments. It represents a necessary summary of the most important characteristics of the course and the learning outcomes expected from the student to achieve, proving whether he has achieved maximum benefit from the available learning opportunities. It must be linked to the program description

1. Educational institution	Tikrit University - College of Education for Pure Sciences
2. Academic department/center	Chemistry Department
3. Course name/code	Contemporary Biology
4. Available forms of attendance	Attendance is mandatory
5. Semester/year	Annual 2024-2025
6. Number of study hours (total)	60 hours
7. Date this description was prepared	5/1/2025

# 10. Course outcomes, teaching, learning and assessment methods

A- Cognitive objectives:

- 1- Students' ability to use the microscope and know its types and most important parts.
  - 2- Study models of animal and plant cells and identify their shapes, types and methods of division.
- 3- Students' ability to distinguish and cognitively perceive in diagnosing models of different cells fixed on glass slides.

- 4- Introducing students to modern techniques and devices used in dissecting different types of invertebrates and vertebrates such as frogs.
- -5- The student should be able to study the structure and organs of plants through sections

of the root, stem and leaf

6- The student should be able to use different laboratory devices and tools

B - Course specific skill objectives:

- 1 The student should be able to prepare practical and theoretical research in contemporary biology
- 2 The student should be able to know the scientific facts related to biology and the method of diagnosing slides related to animal and plant cells
  - 3 The student should be able to discover information by himself
  - 4 To learn to use laboratory equipment and diagnostic methods

Teaching and learning methods

Lecture or discussion with students by stimulating discussion and exchanging opinions through discussion between the professor and the students and between the students themselves, as well as using modern means of presentation such as Data Show and other appropriate educational means.

Evaluation methods

Oral questions within the lecture

Short daily exams (surprise exam(

Monthly exam and reporting.

C- Emotional and value-based objectives

- 1- Working to encourage students to express their opinions on modern scientific trends.
- 2- Working to create a spirit of interaction among students within the classroom.
  - 3- Guiding the student by the teacher to acquire scientific information
  - 4- Developing the student's ability to dialogue and scientific discussion

Teaching and learning methods

1- Use electronic means of clarification.

2- Use the discussion method in the lecture between the professor and the

students3- Assign students to do research and reports 4- Assign students the homework related to the scientific material.

Evaluation methods

Personal assessment (daily short exams( Oral questions during lectures. Monthly exam and reporting.

- D- General and transferable skills (other skills related to employability and personal development).
  - 1- Gaining self-confidence by conducting experiments
  - 2- Enhancing emotional skills by creating a spirit of competition among students 3- Students should have a spirit of cooperation and work as a team
  - 4- Students should have a deep understanding of animal histology and its types.

## 10.Course Structure:

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first	4		Introduction: Historical review of the growth of biology	Lecture	Quizzes
Second	4	Understand basic principles	1		Quizzes
Third	4	Understand the basic principles	Qualities of life, definition of qualities of life	Lecture	Quizzes
Fourth	4	Understand the basic principles	The main method of building living matter	Lecture	Quizzes
Fifth	4	Understand the basic principles	Classification of living things, historical stages, classification systems	Problem solving	Homework
Sixth	4	Understand the basic	Principles of classification of plants and animals	Lecture	Quiz, Preparing reports

		principles			and homework
Seventh	4	Understand the basic principl	Gender concept	Problem solving	Homework
Eighth	4	Understand The basic principles	Reproduction and growth, reproduction and growth in plants	Lecture	Quiz, preparing reports and homework
Ninth	4	Understand The basic principles	Reproduction and growth in animals	Problem solving	Homework
Tenth	4	Understand The basic principles	Hormonal coordination, coordination in animals	Lecture	Quiz, preparing reports and homework
Eleventh	4	Understand The basic principles	Coordination in plants	Problem solving	Quiz, preparing report and Homework
Twelfth	4	Understand The basic principl	Evolution, Theories of Evolution, Lamarckism, Rotationism	Problem solving	Homework
Thirteen	4	Understand The basic principles	Evolution of low- lying animals	Lecture	Quiz, preparing reports and homework
Fourteenth	4	Understand The basic principl	Vertebrate evolution	Problem solving	Homework
Fifteenth	1	Semester exam		-	-
Sixteenth	4	Understand The basic principles	Biological behavior, nervous system and behavior, innate behavior and learning	Lecture	Quiz, preparing reports and homework
Seventeenth	4	Understand The basic principles	Orientation in time and space, mass movement and migration	Lecture	Quiz, preparing reports and homework
Eighteenth	4	Understand	Monotony and life	Lecture	Quiz

Nineteenth	4	The basic Principles  Understand The	clock, hierarchical dominance in animal groups, examples of animal behavior  Ecology, some concepts of	Lecture	Quiz
Twentieth	4	Understand The basic principles	ecology Ecosystem	Lecture	Quiz
Twenty- first	4	Understand The basic principles	Biogeochemical courses	Lecture	Homework
Twenty- second	4	Understand The basic principles	Energy flow	Lecture	Homework
Twenty third	4	Understand The basic principles	Food chain	Lecture	Quiz
Twenty fourth	4	Understand The basic principles	food web	Lecture	Quiz
Twenty- fifth	4	Understand The basic principles	Aquatic and terrestrial biomes	Lecture	Homework
Twenty- sixth	1	-	Semester exa	-	-

# 13. Curriculum Development Plan

The curriculum should be more comprehensive and the interest in biology should be broader because it is linked to the stages of development and emergence of living organisms and the differences between animal and plant cells, as well as preparing modern editions with modern and valuable scientific sources to keep pace with modern science in this field

# **Course Description Form**

### 8. Course Objectives

### **Course Objectives**

- A- Teaching students the English language and all its skills.
- B- Preparing a competent physical education teacher proficient in using a secondary language.
- C- Preparing a student capable of understanding the English language and its skills.
- D-Developing students' level and raising their awareness of the importance of language in both elementary and advanced stages.
- E- Investing in the English language subject theoretically and practically to enhance the educational level.

	1	
material	he	receives.

- **3.** Readiness to cooperate with others in solving mathematical problems.
- 4. The ability to interact and discuss with his peers or professor to solve a specific issue.

#### 9. Teaching and Learning Strategies

#### Strategy

The following strategies are followed:

- 1-Teaching using the discussion method between the student and the instructor to support viewpoints.
- 2- Learning through brainstorming among students.
- 3- Collaborative learning by assigning students to prepare reports on course topics.
- 4- Teaching using the one-minute paper technique, like competitions to foster enthusiasm among students.
- 5- Learning by making the student as a teacher to enhance his selfconfidence.
- 6- Learning through daily and monthly attendance examinations.
- 7- Learning using problem-solving strategy.

#### 10. Course Structure

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation
		Outcomes	name	method	method
1	2	Knowledge	The Subsets of the set of the real numbers	Use the white board And Display Screen. Use the Electronic tutorial	Monthly and Daily Exam Oral questions
2	2	Knowledge	The Intervals The Types of The Intervals The Finite Intervals The Infinite Intervals	Use the white board And Display Screen. Use the Electronic tutorial	Monthly and Daily Exam Oral questions
3	2	Knowledge	The Inequalities & Types The Inequalities Of The First Degree The Inequalities Of The Second Degree	Use the white board And Display Screen. Use the Electronic tutorial	Monthly and Daily Exam Oral questions
4	2	Knowledge	The Absolute Value& The Properties Of The Absolute Value with The Solution Of The Inequalities Which Includes The Absolute Value	Use the white board And Display Screen. Use the Electronic tutorial	Monthly and Daily Exam Oral questions

# Academic Program Description Second stage course Developmental Psychology

This course description provides a concise summary of the main features of cted of the student, the course and the learning outcomes expe demonstrating whether the student has made the most of the learning • opportunities available. It must be linked to the programme description

#### For Humanities

Ministry of Higher Education and Scientific	Educational institution
Tikrit University / Research	
College of Education for Pure Sciences /	Scientific Department /
Department of Chemistry	Center
developmental psychology	Name of academic or
	professional program
Chemistry -Bachelor	Final Certificate Name
annual	:Academic system
	Courses / Other / Annual
	Accredited Certification
	Program
	Other external influences
0202 - 0202	Description preparation date

# Academic Program Objectives

Providing the student with insight into the concept of developmental psychology, -1 . ance and goalsits import

The student's ability to identify the growth requirements at each developmental -2 .stage

The student should distinguish between the theories of cognitive, psychological -3 . and social development

portance of adolescence as a critical stage in The student should realize the im -4

.growth, its problems, ways to treat it, and its characteristics

.The student acquires abilities and skills in developmental psychology -5

# .dsRequired program outcomes, teaching, learning and assessment metho

Cognitive objectives

Providing the student with the basic knowledge, concepts and information of -A1 .developmental psychology

The student should become familiar with the general principles and laws of -A2 .human development

ing light on the developmental characteristics of each Understanding and shedd -A3 .stage of growth, from childhood through adolescence, youth and old age Understanding and comprehending the theories that explain all aspects of -A4 .personal, social, and moral ,growth: physical, psychological, mental, emotional The student acquires knowledge of genetic and environmental factors affecting -A5

.growth

Program specific skill objectives -B

The student should be able to understand the characteristics of developmental - B1 .the scientific material psychology for

The student should be able to acquire the skill of applying moral, cognitive and - B2 .social theories

solving skills -The student should be able to develop developmental problem - B3 .ng for themwithin the stages of growth and methods of cari

# Teaching and learning methods

- .(The inductive method (lecture-
- .(Discussion method (educational dialogue-
- .The method of educational groups in taking turns in discussion-
- , Preparing, preparing and using modern scientific techniques-PowerPoint .

#### **Evaluation methods**

up, -Formative assessment (daily exams, class discussion, homework and follow-.(class assessment, educational applications, discussion groups, periodic tests of success Diagnostic assessment (semester and final exams to issue judgments-(and failure

- .Emotional and value goals -C
- .Encouraging the student to use developmental psychology methods -A1
- .To apply the principles of developmental psychology -A2

gative Developing the student's ability to distinguish between positive and ne -A3 .social upbringing methods within each stage of development

to appreciate the feelings and emotions of Developing the student's ability -A4 .others and how to control them in a positive way

## **Teaching and learning methods**

al teaching methods, because they are value objectives do not depend on tradition :that cannot be taught like cognitive objectives, so they depend on

Overcoming some problems during childhood, adolescence and youth, and how -1 .to choose a partner and work

ory of good values and sound moral and social Forming a general categ -2 .development

Providing psychological motivation to achieve emotional goals of growth and -3 .development

Growth is an individual process, meaning that each person grows in a unique -4 .way

#### **Evaluation methods**

Affective goals are not assessed through traditional tests, but rather rely on observing the student's behavior, interviewing them, discussing them, and following up on their relationship with the educational environment, which provides .d of their representation of affective and value goalsa cumulative recor

General and transferable skills (other skills related to employability and personal -D .(development

.Scientific dialogue and discussion skills -D1

documentation and ,Modern technology skills in communications -D2

- .communication with scientific institutions and centers
- .Teamwork skills, especially in scientific research -D3

Skills in solving educational problems using educational and psychological -D4 .programs and methods

# methods Teaching and learning

Adopting the electronic class via Google Meeting.

.Inductive (deductive) method

.Problem solving method

He repeated the training courses and seminars to provide female students with the n fruitful dialogue, and ability to communicate with society, the ability to engage i .solve educational problems using scientific methods

Classroom interaction and exchange of opinions between the student and the teacher .to raise learning difficulties and discuss their solutions

.s to studentsUsing PowerPoint to present lecture

#### **Evaluation methods**

.Oral and written tests, individual and group, theoretical and practical Direct observation of the student's performance in the areas of dialogue, intellectual e classroom and the college and scientific communication, and teamwork within th and university environment

Assigning students to prepare scientific research to test their ability to think, draw .conclusions and solve problems

.Periodic tests-

# 11. Planning for personal development

- unication through seminars, conferences and joint work Scientific comm .with qualified cadres in similar specializations
  - Reviewing international studies in similar departments, to develop the ability to research and solve scientific problems
    - dern scientific experiences and skills in the Engaging in acquiring mofield of modern technical communication

12.(Admission Criteria (Setting regulations for admission to a college or institute

Admission to the college follows the central distribution system adopted - istry of Higher Education and Scientific Research according to by the Min the admission form for Iraqi universities and institutes and by balancing between the student's desire and the total he obtained

ical As for admission to the Department of Educational and Psycholog Sciences, it is subject to a competitive exam, with a balance between the

.student's desire for the sixth grade in secondary school 13. The most important sources of information about the program s in similar The program link on the Internet, and its application -.universities Training courses held by the University Quality and Performance -.Departments on the program in various institutes and colleges in Iraq

Attendance

6. Number of Credit Hours (Total) / Number of Units (Total)

60 hours-6 units (4 +2 units)

# 7. Course administrator's name (mention all, if more than one name)

Name: Iman Nazhan Mahdi Email:: eman.nazhan@tu.edu.iq

# 8. Course Objectives

#### **Course Objectives**

- This course aims to provide the student with comprehensive information about contemporary biology
- Learn about the light microscope and how to use it in practical experiments
- Teach the student laboratory methods in examining animal and plant cell models
- Learn about the types of modern classification used in classifying living organisms and methods of identifying them from the general shape and vital function performed by the living organism
- Teach the student modern methods in writing practical laboratory reports and using laboratory equipment, which gives the student the possibility of use after graduation
- Focus on the outputs of the College of Education for Pure Sciences to graduate a generation that can occupy teaching positions in the Ministry of Higher Education and the Ministry of Education

#### 9. Teaching and Learning Strategies

#### Strategy

- 1- Method of delivering lectures through modern educational means. Using modern technology by displaying explanatory slides of scientific models in addition to scientific videos, via display screens
- 2- Giving practical lectures based on laboratory equipment
- 3- Preparing scientific reports

- 4 -Field visits to scientific laboratories
- 5 -Opening the way for scientific discussions for students to increase comprehension and expand understanding using interactive lectures Dialogue and discussion Brainstorming

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation
		Outcomes	name	method	method
First	2	Understand the topic of the lecture	General instructions, laboratory supplies and tools, drawing method	In person	Classroom performance and exams
Second	2	Understand the topic of the lecture	Compound microscope and its structure, microscope care and how to use it, cell	In person	Classroom performance and exams
Third	2	Understand the topic of the lecture	Study of plant cell models, cell shapes, cell division, types of divisions and their roles	In person	Classroom performance and exams
Fourth	2	Understand the topic of the lecture	Examine animal and plant cell models, understand the lecture topic, explain the stages	In person	Classroom performance and exams
Fivth	2	Understand the topic of the lecture	Different divisions of tissues.	In person	Classroom performance and exams

Sixth	2	exam	Exam	In person	Classroom performance and exams
Sevent h	2	Understand the topic of the lecture	Study of different types of animal tissues	In person	Classroom performance and exams
Eighth	2	Understand the topic of the lecture	Sections, different animal tissues	In person	Classroom performance and exams
Ninth	2	Understand the topic of the lecture	Classification of living things	In person	Classroom performance and exams
Ten	2	Understand the topic of the lecture	Study of living models in different kingdoms	In person	Classroom performance and exams
eleven	2	Exam		In person	Classroom performance and exams
twelve	2	Understand the topic of the lecture	Learn about invertebrate anatomy	In person	Classroom performance and exams

Thirtee n	2	Understand the topic of the lecture	Dissection model of insects	In person	Classroom performance and exams
Fourtee n	2	Understand the topic of the lecture	And identify all the insect body systems	In person	Classroom performance and exams
Fifteen	2	Understand the topic of the lecture	Identify the different groups of chordates.	In person	Classroom performance and exams
Sixteen	2	Understand the topic of the lecture	Chordate characteristics	In person	Classroom performance and exams
Sevente en	2	Exam	Exam	In person	Classroom performance and exams
Eightee n	2	Understand the topic of the lecture	Frog anatomy	In person	Classroom performance and exams
Ninetee n	2	Understand the topic of the lecture	Learn about the internal organs of the frog	In person	Classroom performance and exams

Twenty	2	lat tha laatura	Study of plant structure and organs	•	Classroom performance and exams
Twenty one	2	Understand the topic of the lecture	Root section study	•	Classroom performance and exams
Twenty	2	of the leature	cross section study of leg		Classroom performance and exams
Twenty three	2	_ f +     +	Study a section of the paper	•	Classroom performance and exams
Twenty Four	2	Exam	Exam		Classroom performance and exams

8. Course Objectives								
Course Objectives	• The student acquires knowledge about computer principles and office applications.							
	<ul> <li>The student acquires sufficient knowledge about computer basics</li> <li>The student acquires sufficient knowledge about the classification of operating</li> </ul>							
	systems Windows 7, 8, 10							

- The student acquires sufficient knowledge about the components of the desktop, the start menu and the taskbar.
- The student acquires sufficient knowledge about files and folders.

# 9. Teaching and Learning Strategies

## Strategy

- Managing the lecture in a practical manner related to the reality of daily life to attract the student to the subject of the lesson without straying from the core of the subject so that the material is flexible and capable of being understood and analyzed.
- Allocating a percentage of the grade for daily assignments and tests.

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation
		Outcomes	name	method	method
1.	2	Cognitive	Desktop Components	Lecture	General questions and discussion
2.	2	Cognitive	Start Menu	Lecture	General questions and discussion
3.	2	Cognitive	Taskbar	Lecture	General questions and discussion
4.	2	Cognitive	Search for files and programs on the computer	Lecture	General questions and discussion

Strategy								
10. Course S	tructure							
Week Hours	Required Learning	Unit or s	subject	Learning	Evaluation			
	Outcomes	name		method	method			

1-2	4	The student gets to know the importance of analytical chemistry, analytical chemistry, and quantitative gravimetric analysis.	Analytical chemistry and quantitative gravimetric analysis	Lecture method.	Discussion during the lecture.
3-4	4	The student learns how to calculate the gravimetric coefficient	the chemical composition of the precipitate, and the calculations in quantitative gravimetric analysis	Lecture method.	Solve mathematical examples
5	2	Knowing the importance of the precipitate being poorly soluble.	Solubility of the precipitate	Lecture method.	Discussion during the lecture.
6-9	6	The student gets to know the most important factors affecting solubility	Factors affecting the solubility of precipitate	Lecture method.	Discussion during the lecture.
10	2	The importance of crystal formation	The crystal formation of the precipitate	Lecture method.	Discussion during the lecture.
11	2	The student learns a general introduction to separation methods	the theoretical foundations of separation methods	Lecture method.	Discussion during the lecture.

12	2	The student learns about other methods	Separation techniques using the indirect methods	Lecture method.	Discussion during the lecture.
13-14	4	The student learns about the extraction method and the use of a separating funnel		Lecture method.	Discussion during the lecture.
15	2	The student learns how to calculate the distribution coefficient,		the lecture method	solving mathematical examples
16-19	6	The student learns about the method of separation		the lecture method	solving mathematical examples
20-22	4	The student learns about the influencing forces and the different systems of interactions	Forces affecting the two phases and extraction systems	Lecture method.	Discussion during the lecture.
23	2	The student learns about the concept of	The chromatography	Lecture method.	Discussion during the lecture.
24-25	4	The student learns about the types of techniques .	C 1 5	Lecture method with illustrative photos.	Discussion during the lecture.

26	2	The student learns about the type of chromatography	Plate chromatography	Lecture method with illustrative photos.	Discussion during the lecture.
27	2		The types of paper used	Lecture method.	Discussion during the lecture.
28	2	The student learns about the method of separation by electrophoresis	Separation by electrophoresis	Lecture method with illustrative photos.	Discussion during the lecture.
29-30	4	The student learns about the ion exchange method	The ion exchange method	Lecture method with illustrative photos .	Discussion during the lecture.

	Program
	.Other external influences
0202 – 0202	.Description preparation date
A andomia Dungamam Ohigatiyyag	

.Academic Program Objectives

t of developmental psychology, Providing the student with insight into the concep -1 . its importance and goals

The student's ability to identify the growth requirements at each developmental -2 .stage

The student should distinguish between the theories of cognitive, psychological -3 and social development

The student should realize the importance of adolescence as a critical stage in -4 .growth, its problems, ways to treat it, and its characteristics

.The student acquires abilities and skills in developmental psychology -5

#### teaching, learning and assessment methods, Required program outcomes.

- Cognitive objectives

Providing the student with the basic knowledge, concepts and information of -A1 .developmental psychology

The student should become familiar with the general principles and laws of -A2 .development human

Understanding and shedding light on the developmental characteristics of each -A3 stage of growth, from childhood through adolescence, youth and old age Understanding and comprehending the theories that explain all aspects of -A4 physical, psychological, mental, emotional, personal, social, and moral growth The student acquires knowledge of genetic and environmental factors affecting -A5 growth

Program specific skill objectives -B

haracteristics of developmental The student should be able to understand the c - B1 .psychology for the scientific material

The student should be able to acquire the skill of applying moral, cognitive and - B2 .social theories

solving skills -The student should be able to develop developmental problem - B3 .ithin the stages of growth and methods of caring for themw

#### Teaching and learning methods

- .(The inductive method (lecture-
- .(Discussion method (educational dialogue-
- .The method of educational groups in taking turns in discussion-
- , d using modern scientific techniquesPreparing, preparing an-PowerPoint .

#### **Evaluation methods**

up, -Formative assessment (exams) Daily, class discussion, homework and follow-(class assessment, educational applications, discussion groups, periodic tests semester and final exams to issue judgments of success ) Diagnostic assessment-(and failure

- . Emotional and value goals -C
- .Encouraging the student to use developmental psychology methods -A1
- .To apply the principles of developmental psychology -A2

ability to distinguish between positive and negative Developing the student's -A3

.social upbringing methods within each stage of development

to appreciate the feelings and emotions of Developing the student 's ability -A4 .others and how to control them in a positive way

#### and learning methods Teaching

objectives do not depend on traditional teaching methods, because they are value :objectives that cannot be taught like cognitive objectives, so they depend on how Overcoming some problems during childhood, adolescence and youth, and -1 .to choose a partner and work

Forming a general category of good values and sound moral and social -2 .development

Providing psychological motivation to achieve emotional goals of growth and -3 .development

hat each person grows in a unique Growth is an individual process, meaning t -4 .way

#### **Evaluation methods**

Affective goals are not assessed through traditional tests, but rather rely on observing the student's behavior, interviewing them, discussing them, and he educational environment, which provides following up on their relationship with t a cumulative record of their representation of affective and value goals

General and transferable skills (other skills related to employability and personal -D .(development

. cussion skillsScientific dialogue and dis - D1

Modern technology skills in communications, documentation and -D2

- .communication with scientific institutions and centers
- .Teamwork skills, especially in scientific research -D3

and psychological Skills in solving educational problems using educational -D4 .programs and methods

#### **Teaching and learning methods**

Adopting the electronic class via Google Meeting.

.Inductive (deductive ) method

.Problem solving method

h the He repeated the training courses and seminars to provide female students wit ability to communicate with society, the ability to engage in fruitful dialogue, and .solve educational problems using scientific methods

Classroom interaction and exchange of opinions between the student and the teacher .s and discuss their solutions to raise learning difficultie

.Using PowerPoint to present lectures to students

#### **Evaluation methods**

.Oral and written tests, individual and group, theoretical and practical e, intellectual Direct observation of the student's performance in the areas of dialogu and scientific communication, and teamwork within the classroom and the college .and university environment

Assigning students to prepare scientific research to test their ability to think, draw .conclusions and solve problems

.tsPeriodic tes-

#### .Planning for personal development

Scientific communication through seminars, conferences and joint work - with qualified cadres in similar specializations

Reviewing international studies in similar departments, to develop the - research and solve scientific problems ability to

Engaging in acquiring modern scientific experiences and skills in the - field of modern technical communication

.(Admission Criteria (Setting regulations for admission to a college or institute

the college follows the central distribution system adopted Admission toby the Ministry of Higher Education and Scientific Research according to the admission form for Iraqi universities and institutes and by balancing . ainedbetween the student's desire and the total he obt

As for admission to the Department of Educational and Psychological Sciences, it is subject to a competitive exam, with a balance between the .student's desire for the sixth grade in secondary school

.ut the programThe most important sources of information abo

The program link on the Internet, and its applications in similar - universities

Training courses held by the University Quality and Performance - . Departments on the program in various institutes and colleges in Iraq

#### Cource evalution

The final grade for the evaluation is 100 points. The minimum for success is 50 points. The evaluation grade is distributed over the effort of 50 points and the end-of-year exam of 50 points. The agencies for each semester: -

- First month exam of 10 points for each semester
- Second month exam of 10 points for each semester
- Daily preparation and participation 5 points for each semester End-of-year exam 50 points

My presence
6. Number of Credit Hours (Total) / Number of Units (Total)
2 hours theory / 4 units
7. Course administrator's name (mention all, if more than one name)

Name : Dr. Omar Ali Kanosh Email : omar\_alkanosh@tu.edu.iq

#### 8. Course Objectives

### **Course Objectives**

- Identifying the vital molecules and vital compounds that contribute to building the components of the body.
- Graduating teaching staff familiar with the basics of chemistry and various specializations and applying them practically.

The compatibility of the theoretical aspect with the practical aspect in the labor market.

#### 9. Teaching and Learning Strategies

Strategy

Theoretical lectures, electronic lectures, exams

#### 10. Course Structure

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation
		Outcomes	name	method	method
1	2	Analyze, apply, understand	Definition of biochemistry, the important basic life molecules in building the living organism	Lecture	Daily and monthly exams
2	2	Analyze, apply, understand	Carbohydrates, definition of carbohydrates, classification of carbohydrates, structural composition of carbohydrates	Lecture	Daily and monthly exams
3	2	Analyze, apply, understand	Optical activity of saccharides	Lecture	Daily and monthly exams
4	2	Analyze, apply, understand	The ring structure of s saccharides	Lecture	Daily and monthly exams

5	2	Analyze, apply, understand	saccharides reactions	Lecture	Daily and monthly exams
6	2	Analyze, apply, understand	Polysaccharides and their structures	Lecture	Daily and monthly exams
7	2	Analyze, apply, understand	Lipids, definition of lipids	Lecture	Daily and monthly exams
8	2	Analyze, apply, understand	Functions of lipids, classification of lipids	Lecture	Daily and monthly exams
9	2	Analyze, apply, understand	Lipids composition, lipids analysis	Lecture	Daily and monthly exams
10	2	Analyze, apply, understand	Soaping, lipids reactions	Lecture	Daily and monthly exams
11	2	Analyze, apply, understand	Amino acids, definition, composition	Lecture	Daily and monthly exams
12	2	Analyze, apply, understand	Classification, Optical activity	Lecture	Daily and monthly exams
13	2	Analyze, apply, understand	Titration (calibration of amino acids)	Lecture	Daily and monthly exams
14	2	Analyze, apply, understand	Amino acid reactions	Lecture	Daily and monthly exams
15	2	Analyze, apply, understand	Proteins, their functions, their structure	Lecture	Daily and monthly exams
16	2	Analyze, apply, understand	Protein structure, protein denaturation	Lecture	Daily and monthly exams
17	2	Analyze, apply, understand	Enzymes, definition, classification	Lecture	Daily and monthly exams

18	2	Analyze, apply, understand	Enzyme work and theories	Lecture	Daily and monthly exams
19	2	Analyze, apply, understand	Factors affecting enzyme action, enzyme kinetics	Lecture	Daily and monthly exams
20	2	Analyze, apply, understand	Vitamins, definition, classification	Lecture	Daily and monthly exams
21	2	Analyze, apply, understand	Types of vitamins and their functions	Lecture	Daily and monthly exams
22	2	Analyze, apply, understand	Nucleotides, their structure	Lecture	Daily and monthly exams
23	2	Analyze, apply, understand	Nitrogenous bases	Lecture	Daily and monthly exams
24	2	Analyze, apply, understand	Nucleic acids	Lecture	Daily and monthly exams

# Course Description Form

1. Course Name:
Industrial Chemistry/ class 3
2. Course Code:
annual
3. Semester / Year:
2024/2025
4. Description Preparation Date:
5. Available Attendance Forms:
weekly
6. Number of Credit Hours (Total) / Number of Units (Total)
2 hours/ 60 hours
7. Course administrator's name (mention all, if more than one name)

Name: Qader Abdullah Shannak Ema	il: qader.a.shannak@tu.edu.iq
8. Course Objectives	
Course Objectives	<ul> <li>Students' knowledge of the oil industry, which is part of the national wealth.</li> <li>Identify the most important petrochemical industries.</li> </ul>
9. Teaching and Learning Strategies	
Strategy 1. Lectures	

- 2. Meanings of illustration, such as: the smart board.
- 3. Use colorful pictures and diagrams taken from websites.

# 10. Course Structure

Week	Hours	Required Learning	Unit or subject	Learning	Evaluation
		Outcomes	name	method	method
1	2	oil	Oil, theories that explain the origin of the existence of oil	Lecture	weekly and monthly examination
2	2	oil	Chemical composition of crude oil, classification of crude oil, physical properties of crude oil	Lecture	weekly and monthly examination
3	2	oil	Processing crude oil and preparing it for refining	Lecture	weekly and monthly examination
4	2	oil	Petroleum refining operations	Lecture	weekly and monthly examination

5	2	oil	Treatment and purification Processes	Lecture	weekly and monthly examination
6	2	oil	The most important petrochemical industries	Lecture	weekly and monthly examination
7	2	oil	The most important petrochemical industries	Lecture	weekly and monthly examination
8	2	oil	Aromatic materials as raw materials for petrochemical industries	Lecture	weekly and monthly examination
9	2	oil	Aromatic materials as raw materials for petrochemical industries	Lecture	weekly and monthly examination
10	2		Examination		
11	2	oil	Halogen compounds in petrochemical industries	Lecture	weekly and monthly examination

12	2	oil	Halogen compounds in petrochemical industries	Lecture	weekly and monthly examination
13	2	oil	Oxidation processes in petrochemical industries	Lecture	weekly and monthly examination
14	2	oil	Oxidation processes in petrochemical industries	Lecture	weekly and monthly examination
15	2	oil	Oxidation processes in petrochemical industries	Lecture	weekly and monthly examination
16	2	Glass	Glass industry	Lecture	weekly and monthly examination
17	2	Glass	Glass industry	Lecture	weekly and monthly examination
18	2	Corrosion	Corrosion in chemical industries	Lecture	weekly and monthly examination

19	2	Corrosion	Corrosion in chemical industries	Lecture	weekly and monthly examination
20	2	Corrosion	Chemical corrosion theories	Lecture	weekly and monthly examination
21	2	Corrosion	Factors affecting corrosion	Lecture	weekly and monthly examination
22	2		Examination		
23	2	Water	Water and industry	Lecture	weekly and monthly examination
24	2	Cement	Cement industry	Lecture	weekly and monthly examination
25	2	Pollution	Forms of environmental pollution	Lecture	weekly and monthly examination

26	2	Sulfuric acid	Sulfuric acid industry	Lecture	weekly and monthly examination
----	---	---------------	------------------------	---------	--------------------------------------

#### 11.Course Evaluation

Monthly exam: 70% Daily exam: 10%

Daily participation: 10%

Reports: 10%

## 12.Learning and Teaching Resources

Required textbooks (curricular books, if any)

**Course Description Form** 

Course name .1
Fourth Stage -Industrial Chemistry
Course code .2
Semester/Year .3
annual
was prepared Date this description .4
2024/20/10
Available forms of attendance .5
Live attendance in classrooms

#### (Number of study hours (total) / Number of units (total .6

#### practical / 2 units 3

## (Name of the course supervisor (if more than one name is mentioned .7

: r Abdullah Shannak EmailName: QadeQader.a.shannak@tu.edu.iq

#### Course objectives .8

- Introducing the student to the concept of industrial chemistry
- industrial processes
- Knowing the most important types of chemical industries d using available in Iraq an industrial technology
- Deep understanding of chemical processes in terms of chemical reactions

Subject objectives

### Teaching and learning strategies .9

Daily assignments, reports and tests -1

Daily diverse analytical and interpretive -2

.essonquestions during the l

Guiding students to benefit from -3

external resources available around the

.course

Strategy

Name: M.M.Omar Watheq Hala

## Course objectives .8

Explaining to students how to -9.

prepare solid and liquid solutions.

Introducing students to the -10 correction process and how it is carried out in the lab.

- Providing students with -6 general information about . chemistry industrial
- soap to Introducing students -7 methods preparation
- how to Explaining to students -8 deal with chemicals and tools in the laboratory

#### Teaching and learning strategies .9

- Introducing the student to laboratory techniques in industrial chemistry
- Introducing the student to the -2 methods of preparing . laboratory chemicals
- Introducing the student to the -3 risks of chemicals and . laboratory materials
